T-CORE

**Announcing new HIGH TEMP Cellular PVC SDL Grilles
only available from Creative Millwork**

- **HIGH PERFORMANCE** Patented polymer/organic formulation
- **33% less thermal expansion** than standard cellular PVC
- **ATI Tested up to 230°F**
- **No flaring / expansion of material tips** in high temp environment

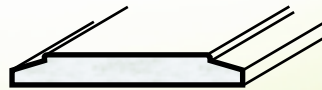

Profiles

TC15

.875" wide x .160" tall

**Available
Now!**

TC16

1.219" wide x .160" tall

**Coming
Soon!**

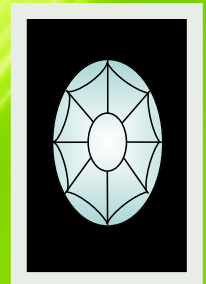

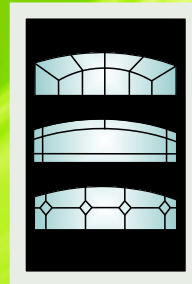

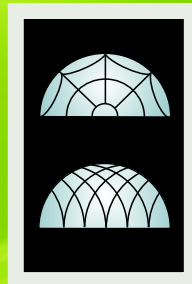

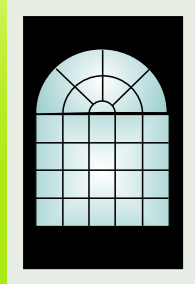

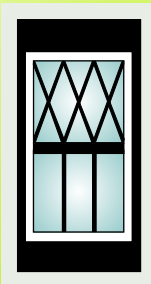

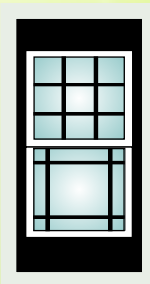

TC23

2.000" wide x .160" tall

**Coming
Soon!**

NOTE: Add .045" thickness for VHB tape

Available in the grille patterns and painted colors you need.

Tech Data:

Material tested by ATI (Architectural Testing, Inc., York, PA)

Coefficient of Linear Thermal Expansion testing

ASTM D 696 and ASTM E 831

Cyclic testing temperature range: -30°F thru +230°F

Average calculated value: 2.12×10^{-5} in/in°F

Report No.; A7668.01-106-31
